

GLACIOLOGICAL DATA

PERMAFROST BIBLIOGRAPHY UPDATE 1988-1992

VI INTERNATIONAL CONFERENCE ON PERMAFROST

BEIJING 1993

**World Data Center A
for
Glaciology
(Snow and Ice)**

WDC operated for:
U.S. Department of Commerce
National Oceanic and Atmospheric Administration
National Environmental Satellite, Data, and Information Service
Boulder, Colorado 80303 U.S.A.

WORLD DATA CENTER A

National Academy of Sciences
2101 Constitution Avenue, NW
Washington, DC 20418 USA

World Data Center A consists of the Coordination Office
and the following eight Subcenters:

COORDINATION OFFICE

World Data Center A
National Academy of Sciences
2101 Constitution Avenue, NW
Washington, DC 20418 USA
[Telephone: (202) 334-3368]

GLACIOLOGY (Snow and Ice)
World Data Center A: Glaciology
(Snow and Ice)
Cooperative Inst. for Research in
Environmental Sciences
University of Colorado
Boulder, Colorado 80309 USA
Telephone: (303) 492-5171

MARINE GEOLOGY AND GEOPHYSICS
(Gravity, Magnetics, Bathymetry,
Seismic Profiles, Marine Sediment,
and Rock Analyses):
World Data Center A for Marine
Geology and Geophysics
NOAA, E/GC3
325 Broadway
Boulder, Colorado 80303-3328 USA
Telephone: (303) 497-6487

METEOROLOGY (and Nuclear Radiation)
World Data Center A: Meteorology
National Climatic Data Center
NOAA, E/CC
Federal Building
Asheville, North Carolina 28801 USA
Telephone: (704) 259-0682

OCEANOGRAPHY
World Data Center A: Oceanography
National Oceanographic Data Center
NOAA, E/OC
1825 Connecticut Avenue, NW
Universal Building, Room 406
Washington, DC 20235 USA
Telephone: (202) 673-5594

ROCKETS AND SATELLITES
World Data Center A: Rockets and
Satellites
NASA/Goddard Space Flight Center
Code 630.2
Greenbelt, Maryland 20771 USA
Telephone: (301) 286-7354

ROTATION OF THE EARTH
World Data Center A: Rotation
of the Earth
U.S. Naval Observatory
Washington, DC 20392-5100 USA
Telephone: (202) 653-1529 or 1527

SEISMOLOGY
World Data Center A: Seismology
U.S. Geological Survey
Branch of Global Seismology
and Geomagnetism
Box 25046, Mail Stop 967
Denver Federal Center
Denver, Colorado 80225 USA
Telephone: (303) 236-1500

SOLAR-TERRRESTRIAL PHYSICS (Solar and
Interplanetary Phenomena, Ionospheric
Phenomena, Flare-Associated Events,
Geomagnetic Variations, Aurora,
Cosmic Rays, Airglow):
World Data Center A
for Solar-Terrestrial Physics
NOAA, E/GC2
325 Broadway
Boulder, Colorado 80303-3328 USA
Telephone: (303) 497-6324

SOLID-EARTH GEOPHYSICS (Seismicity,
Earthquake Strong Motion, Tsunamis,
Gravimetry, Earth Tides, Recent
Movements of the Earth's Crust,
Magnetic Measurements, Paleomagnetism
and Archeomagnetism, Volcanology,
Geothermics):
World Data Center A
for Solid-Earth Geophysics
NOAA, E/GC1
325 Broadway
Boulder, Colorado 80303-3328 USA
Telephone: (303) 497-6521

World Data Centers conduct international exchange of geophysical observations in accordance with the principles set forth by the International Council of Scientific Unions. WDC-A is established in the United States under the auspices of the National Academy of Sciences. Communications regarding data interchange matters in general and World Data Center A as a whole should be addressed to World Data Center A, Coordination Office (see address above). Inquiries and communications concerning data in specific disciplines should be addressed to the appropriate subcenter listed above.

GLACIOLOGICAL DATA

REPORT GD-26

PERMAFROST BIBLIOGRAPHY UPDATE 1988-1992

Boulder, Colorado 80303 U.S.A.

In Cooperation with:

*Cold Regions Research and Engineering Laboratory
Hanover, New Hampshire 03755 U.S.A.*

May 1993

DESCRIPTION OF THE WORLD DATA CENTER SYSTEM¹

The World Data Centers (WDCs) were established in 1957 to provide archives for the observational data resulting from the International Geophysical Year (IGY). In 1958 the WDCs were invoked to deal with the data resulting from the International Geophysical Cooperation 1959, the one-year extension of the IGY. In 1960, the International Council of Scientific Unions (ICSU) Comite International de Geophysique (CIG) invited the scientific community to continue to send to the WDCs similar kinds of data from observations in 1960 and following years, and undertook to provide a revised *Guide to International Data Exchange* for that purpose. In parallel the CIG inquired of the IGY WDCs whether they were willing to treat the post-IGY data; with few exceptions, the WDCs agreed to do so. Thus the WDCs have been serving the scientific community continuously since the IGY, and many of them archive data for earlier periods.

In November 1987 the International Council of Scientific Unions (ICSU) Panel on World Data Centers prepared a new version of the *Guide to International Data Exchange*, originally published in 1957, and revised in 1963, 1973 and 1979. The new publication, *Guide to the World Data Center System, Part 1, The World Data Centers (General Principles, Locations and Services)*, was issued by the Secretariat of the ICSU Panel on World Data Centers. This new version of the *Guide* contains descriptions of each of the twenty-seven currently operating disciplinary centers, with address, telephone, telex, and contact persons listed. The reader is referred to the new *Guide* for descriptions of the responsibilities of the WDCs, the exchange of data between them, contribution of data to WDCs, and the dissemination of data by them. The WDCs for Glaciology are listed below.

World Data Center A for Glaciology [Snow and Ice]

Address:	WDC-A for Glaciology CIRES, Campus Box 449 University of Colorado Boulder, Colorado 80309-0449 USA
Telephone:	(303)492-5171
Telex:	7401426 WDCA UC
Telefax:	(303)492-2468
Network Address:	[NSIDC/OMNET] MAIL/USA VAX Mail (via SPAN) KRYOS::NSIDC
Director:	Dr. R. G. Barry

World Data Center B1

Address:	World Data Center B1 for Glaciology Molodezhnaya 3 Moscow 117296 USSR
Telephone:	130-05-87
Telex:	411478 SGC SU
Director:	Dr. V. I. Smirnov

Foreword

The bibliography in this Data Report covers the topics of permafrost, ground ice, frozen soils and geocryology from their scientific, technical and applied aspects. It extends that published as *Glaciological Data, Report GD-21* in 1988, providing a total of over 3,000 references published between 1988 and 1992.

The bibliography has been prepared for publication to coincide with the Sixth International Conference on Permafrost to be held in Beijing, China, in July 1993. As a follow up to the Workshop held at the Fifth International Conference on Permafrost in Trondheim, Norway, 1988, a second workshop on permafrost data and information will be held during the Beijing Conference under the auspices of the International Permafrost Association Working Group on Permafrost Data and Information. It is anticipated that the workshop will help foster awareness of the need to develop inventories of data sets and to accelerate the development of archives of such data. The submission of information on permafrost data to the World Data Centers is encouraged and future issues of *Glaciological Data* will report on progress in this area.

The bibliography was compiled by Ann Brennan of the WDC staff with support from Carol Pedigo. We thank Dr. Yuriy K. Vasil'chuk, Theoretical Problems Department of the Russian Academy of Sciences, Moscow, for his assistance in identifying Russian citations for inclusion in the bibliography, the Library of Congress for the Cold Regions Bibliography which provides approximately half of the entries in this publication and Dr. Jerry Brown for his encouragement and suggestions. We are particularly grateful to the U.S. Army Cold Regions Research and Engineering Laboratory (CRREL) for providing the funds to support printing of this publication.

Permafrost Bibliography Update 1988-1992

Introduction

This bibliography supplements the two published previously in the *Glaciological Data* series, *GD-14, 1978-1982* (approximately 4000 citations), and *GD-21, 1983-1988* (3300 citations). The over 3000 entries in this volume cover the range of permafrost-related literature published from 1988 through 1992.

The bibliography is presented in two sections, a categorized subject listing and an author index. The subject categories used are from the Cold Regions Bibliography Project Thesaurus. The categories are assigned by the editor after a review of the complete record including the keywords used by the original indexer. We feel that this method is most useful to the researcher in a printed format. An index to the categories is printed on pages 3 and 4.

We have attempted to be comprehensive by searching a variety of data sources and using broad subject categories. The primary resource for permafrost-related literature is the **Arctic and Antarctic Regions** CD-ROM produced by the NISC Corporation. It contains data bases produced by several of the important polar and cold regions research centers, including the Cold Regions Research and Engineering Laboratory and the World Data Center A for Glaciology (U.S.); Scott Polar Research Institute (U.K.); Arctic Institute of North America, the Canadian Circumpolar Institute, and the Center for Cold Ocean Resources Engineering (Canada). Other sources searched on line or on CD-ROM are:

Compendex (Engineering Index)
Dissertation Abstracts
Geoarchive
Georef (Bibliography of Geology)
INSPEC
Meteorological and Geoastrophysical Abstracts
NTIS (U.S. National Technical Information Service)

Because we do not have all of the original material in hand, we cannot be certain of the completeness of each citation. However, every effort has been made to ensure accuracy.

We would appreciate your comments on the bibliography - on references we have not included, sources not searched, or subject areas which were not adequately covered. We plan to keep the "Permafrost Bibliography" up-to-date and your suggestions are welcome.

GLACIOLOGICAL DATA SERIES

Glaciological Data, which supersedes *Glaciological Notes*, is published by the World Data Center-A for Glaciology (Snow and Ice) several times per year. It contains bibliographies, inventories, and survey reports relating to snow and ice data, specially prepared by the Center, as well as invited articles and brief, unsolicited statements on data sets, data collection and storage, methodology, and terminology in glaciology. Contributions are edited, but not refereed or copyrighted. There is a \$5 shelf stock charge for back copies.

Scientific Editor: Roger G. Barry

Technical Editor: Ann M. Brennan

The following issues have been published to date:
